

**Alsop Technical College
Liverpool**

Description

Alsop High School is the largest secondary school in Liverpool with over 1700 students. The campus recently benefitted from the construction of a new £8.4m contemporary building .

Nationwide Interiors were delighted to be awarded the contract for the college. It was not only the flagship 'Building Schools for the Future' project in Liverpool, but Nationwide were awarded the "Best Internal Supply Chain Partner" upon completion, achieving our fourth successive "Perfect Delivery" for this contractor.

Our works comprised the supply and installation of ash veneered and paint grade door sets, complete with ironmongery and a large number of internally glazed screens. Additional items included dance hall hand rails (pictured above), skirting boards, window boards & architraves, bench seating, lockers and all associated fixtures and fittings.

Externally we installed pyroc cement boarding and finish with cedar cladding.
